**Description:**

IMPORTANT -- SITE REDESIGN REQUIRES YOU TO SCROLL DOWN AND USE "ADVANCED STYLE SETTINGS" BEFORE INSTALLATION!

*As of May 9th, there is no way to revise your initial selection through this page. If you didn't get them the way you want, unfortunately you have to completely remove the style from the Add-ons page, User Styles section, and then reload this page and choose your style setting options again.*

If you have multiple search engine plugins for the same site, having only an icon may be annoying. This style shows a more classic list-style display. Developed and tested on Firefox 43.

To try different options *after* you install the style, reload the page until you get a green Update button, then you can choose a different option and update to it.

[Show CSS Code](#)
[⚙️ Advanced Style Settings](#)

```

/*
HELLO! This script has optional settings that you can try out if you return to its page: https://userstyles.org/styles/122214/firefox-search-bar-show-engine-names-firefox-43
*/
@-moz-document url(chrome://browser/content/browser.xul) {
/* Make the one-off buttons span the full width */
#PopupSearchAutoComplete .searchbar-engine-one-off-item[tooltiptext] {
width: 100% !important;
height: 24px !important;
background-image: none !important;
padding-left: 6px !important;
box-sizing: content-box !important;
line-height: 1em !important;
}

```

(1) Vertical spacing and columns

Standard 4 pixel whitespace  
 Narrow 2 pixel whitespace  
 Tight 1 pixel whitespace  
 Two columns

(2) Hide the "Search for..." line above the non-default search engines?

Yes, hide it  
 No, show it

(3) Hide the "Add ..." line for a site's own search engine (and the green + on the icon)?

No, show it  
 Yes, hide it for Windows  
 Yes, hide it for Mac OS X  
 Yes, hide it for Linux

(4) Hide the "Change Search Settings" line at the bottom?

No, show it  
 Yes, hide it

(5) Show "Search using ..." tooltip text in or above the search box?

No thanks  
 Yes, in the bar  
 Yes, above the bar

(6) Theming for search engines on hover/selection

No specific theming  
Default "highlight" theming  
White on bright blue  
Bold white on black  
Choose your own (see below)

(6A) Custom text color

(6B) Custom background color

(6C) Custom boldness

Normal  
Bold

### Notes from latest update:

Additional images: {[Vertical spacing options - difference](#)} • {[Turn optional sections of the panel on and off](#)} • {[Overlay default search engine name on search bar](#)}

If you have over 20 search plugins showing in the drop-down, consider using the two-column list style (last item on the drop-down for #1).

#### Change Log:

2017-08-08 Fix selectors to avoid restyling the bottom of the address bar drop-down (Fx55)

2016-02-03 Tweak text position, add two-column option, space for 5 suggestions

2015-12-28 Added color theming options

2015-12-27 Override the green + on the icon if you aren't going to show the Add... bar

2015-12-25 Tweaked Search Bar tooltips to avoid overflowing the available space

2015-12-24 Added option for search box tooltip (e.g., Search using DuckDuckGo)

2015-12-24 Tweak sizes and positions, added install-time options for hiding various parts

2015-12-21 Initial version (+ minor modification to shorten row heights)

Brings back the search bar how it should be

[See More](#)

- Read [tips on making user styles](#).
- To specify which URLs will have the style applied, use [the Mozilla @-moz-document format](#). If you're using Chrome, you can use the "To Mozilla Format" button to generate the code.
- Styles for sites with adult content are not allowed.
- Styles adding adult content to sites are not allowed.
- Do not post other people's content without their permission.
- If you decide to stop maintaining your style, please [delete it](#) rather than blanking it out. By deleting, you can make it so your style doesn't come up in searches while still being accessible via direct access for your current users.

### Name

Firefox Search Bar Show Engine Names (Firefox 43+)

**Description** - A brief (3-4 sentences) description of the style. [Some HTML allowed.](#)

**IMPORTANT -- SITE REDESIGN REQUIRES YOU TO SCROLL DOWN AND USE "ADVANCED STYLE SETTINGS" BEFORE INSTALLATION!**  
 As of May 9th, there is no way to revise your initial selection through this page. If you didn't get them the way you want, unfortunately you have to completely remove the style from the Add-ons page, User Styles section, and then reload this page and choose your style setting options again.  
 If you have multiple search engine plugins for the same site, having only an icon may be annoying. This style shows a more classic list-style display. Developed and tested on Firefox 43.  
 To try different options after you install the style, reload the page until you get a green Update button, then you can choose a different option and update to it.
